UNDERWRITEIQ SYNTHETIC GUIDELINE - ACME PERSONAL AUTO (DEMO DATA)
Page 1 of 3 - Section 1: Base Rates by Driver Class

Table 1 - Base Rate by Driver Class (annual, $)
Driver Class | Base Rate
Preferred | 480
Standard | 620
High Risk | 940

Routine B1 - Base premium formula:
base_premium = base_rate * territory_factor
Evidence: Section 1 formula box, applies to all new business.

Table 2 - Territory Factor (2026 schedule)
Territory | Factor
T01 Urban Core | 1.35
T02 Suburban North | 1.10
T03 Rural – South | 0.92

Routine T1 - Territory eligibility condition:
IF territory IN (T01, T02, T03) THEN apply Table 2 factor
ELSE refer to underwriter (code REF-TERR).

Routine F1 - Final premium calculation steps:
Step 1: Look up base_rate from Table 1 using driver class.
Step 2: Look up territory_factor from Table 2 using territory.
Step 3: final_premium = base_premium + policy_fee, where policy_fee = 25.
Step 4: Round final_premium to the nearest dollar.

Dependencies: F1 depends on B1 (base premium) and T1 (territory check).
Routine G1 - Legacy surcharge note: APPLY legacy_matrix_v2 surcharge curve.
